

# Need a Mammogram? No Insurance?

## You might be eligible for the New Jersey Cancer Education & Early Detection Program (NJ CEED)

Breast cancer is the most common type of cancer among women. It is more treatable when it is found in its early stages. The risk of developing breast cancer increases with age. Eighty percent of women with breast cancer have no family history of the disease.

If you are 40 years or older, contact the NJCEED program to see if you are eligible for **FREE** screening services. Screening sites are available throughout Ocean County.

**Please call (732) 818-6834 for more information.**
